31. March 2018

## **Witness Testimony**

With this I, Volker Hoffmann, film maker and journalist, confirm that I stayed at Dr. Katherine Horton's flat from 28. March to 1. April 2018 in order to document and film the shots on her with electromagnetic weapons. I can confirm that she fled her flat to Germany due to these „shots“ in December, where she also complained about attacks. Back then, I had offered her asylum, so to speak, and conducted an interview with her in the Hotel Atlantik Parkhotel in Baden-Baden. That time, something was shot into her neck according to her testimony. And I can confirm that she suddenly had large swellings in her neck.

During my visit in Unterengstringen, Dr. Horton and I filmed the „shots“ on her during the night. I can confirm that I could hear a loud prattle against metal foil, as well as individual banging sounds. These sounds could not have been caused by Dr. Horton or by me. It could also not have had natural causes as there was no source in the room or the flat that could have caused this effect. Therefore, I can confirm that these sounds must have been caused by external influence. The pulses that caused the impact sounds were invisible and so scattered that it was impossible for me to determine the source of the pulses. These incidents were for me extraordinary.

The „shots“ continued every night over the 4 nights during which I stayed at Dr. Horton's. She complained of extreme pain, which was not present outside the home. Therefore, I can confirm that there must indeed be criminal shots fired at Dr. Horton in her flat. The police should investigate the perpetrators immediately.

I confirm that the above stated facts are the truth.
