

**Certification of Membership  
of the international Joint Investigation Team, US-Europe  
(Directed Energy Weapons, Military Neuro/Biotechnology & Systemic Corruption)**

To whom it may concern,

Please be advised that Dr. Katherine Horton is the founder and leader of the Joint Investigation Team (JIT) and is, with several other high-profile individuals, looking into the illegal use of Directed Energy Weapons and other military technology, including implants, nano-technology and neuro-technology on the civilian population worldwide, as well as investigating systemic corruption in public institutions, which are threatening the functioning of democracies around the world. All of the members of this investigative team have crucial pertinent professional expertise.

Dr Katherine Horton, former Research Fellow at St John's College, University of Oxford, is an important member of our research team because of her qualifications and extensive expertise in high energy physics at DESY and CERN and in the systems analysis of complex human systems.

Should adverse actions be taken against any member of our research team, all of whom are of the highest integrity, we shall consider it to be a direct attack on and sabotage of our research efforts and shall take appropriate measures to protect our members from such harm.
